EASE&SEE Financial evaluation workshops in Italy

- › This part of the work, which is the first one in a chronological order, is dedicated to the organization of **2 local workshops in Veneto Region** which will have the main goal of identifying and analyzing financial tools which may be available to start new initiatives or to expand existing ones
 - › **First workshop: open event Mestre, 16 DECEMBER 2013**
 - › **Second workshop: only for EASE&SEE Local Working Group members
Venice, 29 JANUARY 2014**

The first workshop will provide an overview of specific financial channels relevant to the social enterprises ideas identified within WP5 Business market analysis, and the second one will be a “matching opportunity” between enterprises and investors, and a “starting point” to develop WP6 Unit Supports for Sustainable Development Business Plans.
